Thin Solid Films 347 (1999) 309–314

thin solid films

Subject Index of Volume 347

Activation energy
Calculation of apparent activation energy for the deposition of TEOS-SiO_2 films by PECVD, 112
The effect of growth parameters on the electrical, optical and structural properties of copper phthalocyanine thin films, 284
Adhesion
Effects of Cu seeding layer on Si grown by partially ionized beam in plasma enhanced chemical vapor deposition, 121
Aerosol-gel process
Aerosol-gel deposition and low temperature heat-treatment of SiO_2 layers, 184
Alloys
Study of $Ca_{1-x}Pr_xF_{2+x}$ solid solution thin films grown on silicon substrates, 127
Aluminum nitride
Study of the chemistry of NH_3 on aluminum nitride and oxynitride under steady-state conditions using external-reflection infrared spectroscopy, 195
Aluminum oxide
Study of the chemistry of NH_3 on aluminum nitride and oxynitride under steady-state conditions using external-reflection infrared spectroscopy, 195
Ammonia
Study of the chemistry of NH_3 on aluminum nitride and oxynitride under steady-state conditions using external-reflection infrared spectroscopy, 195
Amorphous metals
X-ray photoelectron spectroscopy of highly conducting and amorphous osmium dioxide thin films, 56
Anisotropy
Exceptional anisotropy in conductivity and mechanical properties of poly-3-octylthiophene films, 146
Annealing
The effect of growth parameters on the electrical, optical and structural properties of copper phthalocyanine thin films, 284
Atomic force microscopy
Photochemically induced oxidation and silver deposition on amorphous germanium sulfide films studied using atomic force microscopy and ion beam methods, 208
Thin films of polyaniline–polyacrylic acid composite by chemical bath deposition, 241

Barrier properties
Barrier properties of TiN/$TiSi_2$ bilayers formed by two-step rapid thermal conversion process for Cu diffusion barrier, 214
Bilayers
Silicidation reactions with Co–Ni bilayers for low thermal budget microelectronic applications, 278
Boron trifluoride-diethy ether
Exceptional anisotropy in conductivity and mechanical properties of poly-3-octylthiophene films, 146

Cadmium
Some physical properties of F-doped CdO thin films deposited by spray pyrolysis, 295
Cadmium telluride
Investigation of Sb-doped CdTe films using XPS, PIXE and XRD, 39
Carbon nitride
Plasma substrate interaction effects on composition and chemical structure of reactively r.f. magnetron sputtered carbon nitride films, 31
Study of C—N binding states in carbon nitride films deposited by reactive XeCl laser ablation, 72
CeO_2
Combustion chemical vapor deposition of CeO film, 25
Cerium
An X-ray absorption study of the local structure of cerium in electrochemically deposited thin films, 178
Chemical bath deposition
Thin films of polyaniline–polyacrylic acid composite by chemical bath deposition, 241
Chemical vapour deposition
Chemical vapor deposition and structural study of $La_{0.8}MnO_{3-\delta}$ thin films, 161
Study of thin chemical vapour deposited tungsten oxide films by positron annihilation spectroscopy, 302
Chemical–mechanical polish
A ULSI shallow trench isolation process through the integration of multilayered dielectric process and chemical–mechanical planarization, 248
Chromium films
Correlation between hardness and embedded argon content of magnetron sputtered chromium films, 46
Combustion chemical vapor deposition
Combustion chemical vapor deposition of CeO film, 25
Composite thin films
Thin films of polyaniline–polyacrylic acid composite by chemical bath deposition, 241

0040-6090/99/$ - see front matter © 1999 Elsevier Science S.A. All rights reserved.
PII: S0040-6090(99)000308-9

Composition
Correlation between hardness and embedded argon content of magnetron sputtered chromium films, 46
Conducting polymers
Effects of Cu seeding layer on Si grown by partially ionized beam in plasma enhanced chemical vapor deposition, 121
Effect of substrate preconditioning on charge transport at the phthalocyanine–conducting polymer film interface, 229
Copper
Barrier properties of TiN/$TiSi_2$ bilayers formed by two-step rapid thermal conversion process for Cu diffusion barrier, 214
The effects of chloride ions and benzotriazole on photoresponses of copper electrodes, 289
CoPt alloy film
High-coercivity CoPt alloy films prepared at ultra-high Ar pressure, 253
Corrosion
An X-ray absorption study of the local structure of cerium in electrochemically deposited thin films, 178
The effects of chloride ions and benzotriazole on photoresponses of copper electrodes, 289
Cross sectional transmission electron microscopy
Growth structure and properties of Fe rich Fe-Ni alloy films deposited on MgO(001) by d.c.-biased plasma-sputtering, 85
A study of the NiSi TO $NiSi_2$ transition in the Ni–Si binary system, 201

Deposition kinetics
Deposition kinetics of silicon dioxide from hexamethyldisilazane and oxygen by PECVD, 99
Deposition process
Process-kinetics in facing targets sputtering of multi-component oxide thin films, 14
Crystalline and nearly stoichiometric vanadium nitride thin film by PLD, 117
Diamond-like carbon
Sizes and distances of metal clusters in Au-, Pt-, W- and Fe-containing diamond-like carbon hard coatings: a comparative study by small angle X-ray scattering, wide angle X-ray diffraction, transmission electron microscopy and scanning tunnelling microscopy, 60
Dielectrics
Selection of dielectrics for alternating-current thin-film electroluminescent device, 1
A ULSI shallow trench isolation process through the integration of multilayered dielectric process and chemical–mechanical planarization, 248
Dielectric properties
Selection of dielectrics for alternating-current thin-film electroluminescent device, 1
Dipping-pyrolysis
Effect of substrate material on the crystallinity and epitaxy of $Pb(Zr,Ti)O_3$ thin films, 106

Elastic properties
Influence of illumination on the microhardness and elastic properties of thin $Ge_xSb_{40-x}S_{60}$ films, 226
Electrical and optical properties
Transparent conductive ITO thin films through the sol-gel process using metal salts, 155
Electrical measurements
Highly ordered vacuum-deposited thin films of copper phthalocyanine induced by electric field, 233
Highly ordered vacuum-deposited thin films of copper phthalocyanine induced by electric field, 299
Electrical properties
Highly ordered vacuum-deposited thin films of copper phthalocyanine induced by electric field, 233
Highly ordered vacuum-deposited thin films of copper phthalocyanine induced by electric field, 299
Electrical properties and measurements
Some physical properties of F-doped CdO thin films deposited by spray pyrolysis, 295
Electrochemical polymerization
Exceptional anisotropy in conductivity and mechanical properties of poly-3-octylthiophene films, 146
Electrochemistry
An X-ray absorption study of the local structure of cerium in electrochemically deposited thin films, 178
Electrodeposition
Investigation of Sb-doped CdTe films using XPS, PIXE and XRD, 39
Electronic devices
Selection of dielectrics for alternating-current thin-film electroluminescent device, 1
Epitaxial growth
Growth structure and properties of Fe rich Fe-Ni alloy films deposited on MgO(001) by d.c.-biased plasma-sputtering, 85
Epitaxy
Effect of substrate material on the crystallinity and epitaxy of $Pb(Zr,Ti)O_3$ thin films, 106
Chemical vapor deposition and structural study of $La_{0.8}MnO_3-\delta$ thin films, 161
Evaporation
Highly ordered vacuum-deposited thin films of copper phthalocyanine induced by electric field, 233
Highly ordered vacuum-deposited thin films of copper phthalocyanine induced by electric field, 299

Fluorides
Study of $Ca_{1-x}Pr_xF_{2+x}$ solid solution thin films grown on silicon substrates, 127
Fourier transform infrared spectrophotometry
Aerosol-gel deposition and low temperature heat-treatment of SiO_2 layers, 184
Fourier transform infrared spectroscopy
Deposition kinetics of silicon dioxide from hexamethyldisilazane and oxygen by PECVD, 99
Fourier transform infrared spectrum
Thin films of polyaniline–polyacrylic acid composite by chemical bath deposition, 241
Friction
Microstructural effects on the friction and wear of zirconia films in unlubricated sliding contact, 220

Growth mechanism

Columnar growth structure and evolution of wavy interface morphology in amorphous and polycrystalline multilayered thin films, 133
Columnar growth structure and evolution of wavy interface morphology in amorphous and polycrystalline multilayered thin films, 167
Hardness
Correlation between hardness and embedded argon content of magnetron sputtered chromium films, 46

Illumination
Influence of illumination on the microhardness and elastic properties of thin $Ge_xSb_{40-x}S_{60}$ films, 226
Indium tin oxide (ITO)
Transparent conductive ITO thin films through the sol-gel process using metal salts, 155
Infrared spectroscopy
Study of the chemistry of NH_3 on aluminum nitride and oxynitride under steady-state conditions using external-reflection infrared spectroscopy, 195
Inhibitor
The effects of chloride ions and benzotriazole on photoresponses of copper electrodes, 289
Interfaces
Columnar growth structure and evolution of wavy interface morphology in amorphous and polycrystalline multilayered thin films, 133
Ion beam methods
Photochemically induced oxidation and silver deposition on amorphous germanium sulfide films studied using atomic force microscopy and ion beam methods, 208
I–V characteristics
Effect of substrate preconditioning on charge transport at the phthalocyanine–conducting polymer film interface, 229
Langmuir–Blodgett films
Particulate multilayers prepared from surfactant-stabilized SnO_2 nanoparticles, 258
Direct observation of 2-D phase transitions of Chiral liquid crystals at the air/water interface, 263
Laser ablation
Study of C—N binding states in carbon nitride films deposited by reactive XeCl laser ablation, 72
Crystalline and nearly stoichiometric vanadium nitride thin film by PLD, 117
LED
Effect of substrate preconditioning on charge transport at the phthalocyanine–conducting polymer film interface, 229
Lithium niobate
Epitaxial growth of ZnO thin films on $LiNbO_3$ substrates, 238
Luminescence
Study of $Ca_{1-x}Pr_xF_{2+x}$ solid solution thin films grown on silicon substrates, 127

Magnetic anisotropy
High-coercivity CoPt alloy films prepared at ultra-high Ar pressure, 253
Mechanical properties
Influence of oxygen flow rate on the structural and mechanical properties of reactively magnetron sputter-deposited Zr–B–O coatings, 78
Metal clusters
Sizes and distances of metal clusters in Au-, Pt-, W- and Fe-containing diamond-like carbon hard coatings: a comparative study by small angle X-ray scattering, wide angle X-ray diffraction, transmission electron microscopy and scanning tunnelling microscopy, 60
Metal ion
Monolayer studies of perfluorostearic acid at air/water interface, 272
Microhardness
Influence of illumination on the microhardness and elastic properties of thin $Ge_xSb_{40-x}S_{60}$ films, 226
Microscopic structure
High-coercivity CoPt alloy films prepared at ultra-high Ar pressure, 253
Microstructure
Correlation between hardness and embedded argon content of magnetron sputtered chromium films, 46
Microstructural effects on the friction and wear of zirconia films in unlubricated sliding contact, 220
Molecular area
Monolayer studies of perfluorostearic acid at air/water interface, 272
Monolayer
Direct observation of 2-D phase transitions of Chiral liquid crystals at the air/water interface, 263
Monolayer studies of perfluorostearic acid at air/water interface, 272
Multilayer thin film
A ULSI shallow trench isolation process through the integration of multilayered dielectric process and chemical–mechanical planarization, 248
Multilayers
Columnar growth structure and evolution of wavy interface morphology in amorphous and polycrystalline multilayered thin films, 133
Columnar growth structure and evolution of wavy interface morphology in amorphous and polycrystalline multilayered thin films, 167
Particulate multilayers prepared from surfactant-stabilized SnO_2 nanoparticles, 258

Nanoparticles
Particulate multilayers prepared from surfactant-stabilized SnO_2 nanoparticles, 258
Nickel monosilicide
A study of the NiSi TO $NiSi_2$ transition in the Ni–Si binary system, 201
NiFe Invar
Growth structure and properties of Fe rich Fe-Ni alloy films deposited on MgO(001) by d.c.-biased plasma-sputtering, 85
Nitrides
Crystalline and nearly stoichiometric vanadium nitride thin film by PLD, 117
Nucleation

Direct observation of 2-D phase transitions of Chiral liquid crystals at the air/water interface, 263

Optical absorption coefficient
Thin films of polyaniline–polyacrylic acid composite by chemical bath deposition, 241
Optical properties
Some physical properties of F-doped CdO thin films deposited by spray pyrolysis, 295
Organic semiconductors
Highly ordered vacuum-deposited thin films of copper phthalocyanine induced by electric field, 233
The effect of growth parameters on the electrical, optical and structural properties of copper phthalocyanine thin films, 284
Highly ordered vacuum-deposited thin films of copper phthalocyanine induced by electric field, 299
Osmium dioxides
X-ray photoelectron spectroscopy of highly conducting and amorphous osmium dioxide thin films, 56
Oxidation
Photochemically induced oxidation and silver deposition on amorphous germanium sulfide films studied using atomic force microscopy and ion beam methods, 208
Oxides
Process-kinetics in facing targets sputtering of multi-component oxide thin films, 14
Chemical vapor deposition and structural study of $La_{0.8}MnO_3-\delta$ thin films, 161

Palladium
Characterization of electroless plated palladium–silver alloy membranes, 91
Partially ionized beam
Effects of Cu seeding layer on Si grown by partially ionized beam in plasma enhanced chemical vapor deposition, 121
Particle flux diagnosis
Plasma substrate interaction effects on composition and chemical structure of reactively r.f. magnetron sputtered carbon nitride films, 31
Perfluorostearic acid
Monolayer studies of perfluorostearic acid at air/water interface, 272
Phase transition
A study of the NiSi TO $NiSi_2$ transition in the Ni–Si binary system, 201
Direct observation of 2-D phase transitions of Chiral liquid crystals at the air/water interface, 263
Photoelectrochemistry
The effects of chloride ions and benzotriazole on photoresponses of copper electrodes, 289
Photoelectron spectroscopy
Investigation of Sb-doped CdTe films using XPS, PIXE and XRD, 39
X-ray photoelectron spectroscopy of highly conducting and amorphous osmium dioxide thin films, 56
Phthalocyanines
Effect of substrate preconditioning on charge transport at the phthalocyanine–conducting polymer film interface, 229
The effect of growth parameters on the electrical, optical and structural properties of copper phthalocyanine thin films, 284
Plasma enhanced chemical vapor deposition
Deposition kinetics of silicon dioxide from hexamethyldisilazane and oxygen by PECVD, 99
Calculation of apparent activation energy for the deposition of TEOS-SiO_2 films by PECVD, 112
Effects of Cu seeding layer on Si grown by partially ionized beam in plasma enhanced chemical vapor deposition, 121
Plasma processes and deposition
Process-kinetics in facing targets sputtering of multi-component oxide thin films, 14
Deposition kinetics of silicon dioxide from hexamethyldisilazane and oxygen by PECVD, 99
Calculation of apparent activation energy for the deposition of TEOS-SiO_2 films by PECVD, 112
Poly-3-octylthiophene
Exceptional anisotropy in conductivity and mechanical properties of poly-3-octylthiophene films, 146
Polyacrylic acid
Thin films of polyaniline–polyacrylic acid composite by chemical bath deposition, 241
Polyaniline
Thin films of polyaniline–polyacrylic acid composite by chemical bath deposition, 241
Positron spectroscopy
Study of thin chemical vapour deposited tungsten oxide films by positron annihilation spectroscopy, 302
PVD coatings
Correlation between hardness and embedded argon content of magnetron sputtered chromium films, 46
Pyrolysis
Some physical properties of F-doped CdO thin films deposited by spray pyrolysis, 295
PZT thin films
Effect of substrate material on the crystallinity and epitaxy of $Pb(Zr,Ti)O_3$ thin films, 106

Reaction kinetics
In-situ observation of $CuInSe_2$ formation process using high-temperature X-ray diffraction analysis, 151
Reactive sputtering
Influence of oxygen flow rate on the structural and mechanical properties of reactively magnetron sputter-deposited Zr–B–O coatings, 78
Residual stresses
Correlation between hardness and embedded argon content of magnetron sputtered chromium films, 46
Rutherford backscattering spectroscopy
Study of $Ca_{1-x}Pr_xF_{2+x}$ solid solution thin films grown on silicon substrates, 127

Saturation magnetization
Growth structure and properties of Fe rich Fe-Ni alloy films deposited on MgO(001) by d.c.-biased plasma-sputtering, 85
Scanning electron microscopy
Characterization of electroless plated palladium–silver alloy membranes, 91

Seed layer
Effects of Cu seeding layer on Si grown by partially ionized beam in plasma enhanced chemical vapor deposition, 121
Semiconductors
In-situ observation of $CuInSe_2$ formation process using high-temperature X-ray diffraction analysis, 151
Sensitization
Effect of substrate preconditioning on charge transport at the phthalocyanine–conducting polymer film interface, 229
Shallow trench isolation
A ULSI shallow trench isolation process through the integration of multilayered dielectric process and chemical–mechanical planarization, 248
Silica films
Aerosol-gel deposition and low temperature heat-treatment of SiO_2 layers, 184
Silicidation
Silicidation reactions with Co–Ni bilayers for low thermal budget microelectronic applications, 278
Silicon local oxidation
A ULSI shallow trench isolation process through the integration of multilayered dielectric process and chemical–mechanical planarization, 248
Silicon oxide
Deposition kinetics of silicon dioxide from hexamethyldisilazane and oxygen by PECVD, 99
Calculation of apparent activation energy for the deposition of TEOS-SiO_2 films by PECVD, 112
Silver
Characterization of electroless plated palladium–silver alloy membranes, 91
Sliding contact
Microstructural effects on the friction and wear of zirconia films in unlubricated sliding contact, 220
SnO_2
Particulate multilayers prepared from surfactant-stabilized SnO_2 nanoparticles, 258
Solar cells
In-situ observation of $CuInSe_2$ formation process using high-temperature X-ray diffraction analysis, 151
Sol-gel
Transparent conductive ITO thin films through the sol-gel process using metal salts, 155
Sol-gel chemistry
Aerosol-gel deposition and low temperature heat-treatment of SiO_2 layers, 184
Sputtering
Process-kinetics in facing targets sputtering of multi-component oxide thin films, 14
Plasma substrate interaction effects on composition and chemical structure of reactively r.f. magnetron sputtered carbon nitride films, 31
Correlation between hardness and embedded argon content of magnetron sputtered chromium films, 46
Growth structure and properties of Fe rich Fe-Ni alloy films deposited on MgO(001) by d.c.-biased plasma-sputtering, 85
Epitaxial growth of ZnO thin films on $LiNbO_3$ substrates, 238
Structural properties
Investigation of Sb-doped CdTe films using XPS, PIXE and XRD, 39
Influence of oxygen flow rate on the structural and mechanical properties of reactively magnetron sputter-deposited Zr–B–O coatings, 78
Columnar growth structure and evolution of wavy interface morphology in amorphous and polycrystalline multilayered thin films, 133
Chemical vapor deposition and structural study of $La_{0.8}MnO_3-\delta$ thin films, 161
Columnar growth structure and evolution of wavy interface morphology in amorphous and polycrystalline multilayered thin films, 167
Structure and morphology
Transparent conductive ITO thin films through the sol-gel process using metal salts, 155
Substrates
Effect of substrate material on the crystallinity and epitaxy of $Pb(Zr,Ti)O_3$ thin films, 106

Temperature coefficient of resistance
Growth structure and properties of Fe rich Fe-Ni alloy films deposited on MgO(001) by d.c.-biased plasma-sputtering, 85
Tensile strength
Exceptional anisotropy in conductivity and mechanical properties of poly-3-octylthiophene films, 146
Thermal conversion
Barrier properties of $TiN/TiSi_2$ bilayers formed by two-step rapid thermal conversion process for Cu diffusion barrier, 214
Thin ceria films
Combustion chemical vapor deposition of CeO film, 25
Thin films
Study of C—N binding states in carbon nitride films deposited by reactive XeCl laser ablation, 72
Titanium nitride
Barrier properties of $TiN/TiSi_2$ bilayers formed by two-step rapid thermal conversion process for Cu diffusion barrier, 214
Tungsten oxide
Study of thin chemical vapour deposited tungsten oxide films by positron annihilation spectroscopy, 302

Wear
Microstructural effects on the friction and wear of zirconia films in unlubricated sliding contact, 220

X-ray absorption
An X-ray absorption study of the local structure of cerium in electrochemically deposited thin films, 178
X-ray diffraction
Characterization of electroless plated palladium–silver alloy membranes, 91
Epitaxial growth of ZnO thin films on $LiNbO_3$ substrates, 238
In-situ observation of $CuInSe_2$ formation process using high-temperature X-ray diffraction analysis, 151
X-ray diffractogram

The effect of growth parameters on the electrical, optical and structural properties of copper phthalocyanine thin films, 284

X-ray photoelectron spectroscopy
Study of C—N binding states in carbon nitride films deposited by reactive XeCl laser ablation, 72

Zinc oxide
Epitaxial growth of ZnO thin films on $LiNbO_3$ substrates, 238

Zirconium diboride
Influence of oxygen flow rate on the structural and mechanical properties of reactively magnetron sputter-deposited Zr–B–O coatings, 78

Zirconium oxide film
Microstructural effects on the friction and wear of zirconia films in unlubricated sliding contact, 220
